

E is for everything and it is indeed a while
Since I did my 60 secs in my own unique style

Leaves to be raked up are still lying a plenty
And compost bins its now time to empty

We spread this black gold on to the borders
And with some customers we await their particular orders

The seasons are changing and there is still lots to do
Oh yes and we even have to pick up some dog pooh

This too is the time that we do some cutting back
But there are times we have to try and sort out where someone at a shrub
has had a good hack

At this time of year we look at some lawns and give a hefty sigh
When we see the thickness of moss and thatch and have to organise to
give it a scarify

Now is also a good time to redesign a garden
Especially before the frosts come and the ground begins to harden

Most gardens are now looking somewhat duller
And as I mentioned last week we can plan for all year round colour

We are coming to the end of our spring colour campaign
All these 1000's and 1000's of bulbs to plant drove some of the men quite
insane

So from my selection of work we perform
You will realise that to us it is the norm

We offer a service that is second to none
With a guarantee that the work in your garden will be done

We perform a service for all your garden needs
Even to the extent of giving the birds some seeds

So if you know of anyone who need some help at the beginning of the
year
Please tell that Tidy Gardens is here
