

My F for today has to be a garden well in flower  
And where best to enjoy this from but your garden Bower

At this time of year your garden should be full bulbs giving lots of colour  
But when it just got weeds, we just look at it with a bit of a glower.

F is also for fescue and the fine grass that creates a good lawn  
And F for Fruit trees that still need the odd branch to be sawn.

Forsythia with its yellow blossom is now in full flower and looking very good  
Acanitum is now coming on well too and it's common name is Monks Hood

Your garden may be weedy and in need of help I'm sure  
A visit from Tidy gardens could produce a very good cure.

F is Frost and both the damage and good it can do  
And there is also Flax, Fuchsia, ferns, Figs and Foxgloves to name but a few.

Flowing borders filled with colour we can create  
Right from the door right down to the garden gate.

We can fork your beds and turn soil over  
We can also rid your lawn of that pesky clover.

For a garden full of flowers and even some fully formed fruit  
I am sure we can do this for you and have your neighbours wanting to follow suit.

So for a garden full of flowers and free of weeds  
It has to be Tidy gardens all your garden needs
