

L can be for lots of plants and shrubs
Many of which you could use to fill your tubs

L could also be for the lenten rose
This in itself can give quite a striking pose

Laurel, Lilac, Lavatera and Laburnum you should all know
Lavenders, lupins and Livingstone daisies from seeds you can also sow.

L can be for your garden landscape all around
And indeed for the lush colours that can certainly abound

L can be for the lush lawns that we want to achieve
And L for the lovely garden we are charged to retrieve

So as you can gather there can be lots of L's in the gardening world
With lots of wheelbarrows with muck to be hurled

Spring is just around the corner and things will begin to grow
And of course the weeds that do come up will be treated as the foe

At this time we are busy getting the lawns looking good and ready to grow
And of course its looks depends on how often we're allowed to mow

Some borders still need to be tidied up and the dead growth taken away
Some are so overgrown that the task can take us more than a day

So now is the time to get us in and have the garden looking its best
Just take that decision and let us do the rest

And so for a garden that will be lovely and lush and free of weeds
Just call on Tidy Gardens all your garden needs.
