

Q is quite quirky to find something to say
So you'll be pleased to hear my ditty is quite short to day

Gardens that are neat and tidy is really our Quest
With nice lawns to cut we like best

Some gardens we undertake can make us feel, to say the least somewhat queasy
Others we do are straight forward and relatively Easy

Some gardens are quaint whilst others are somewhat quirky
And some have ponds where the water is a bit murky

In designing a garden we try to create quiet corners
And also introduce interesting herbaceous borders

In the plant world there are very few beginning with Q
Listed there are really only two

Quercus the mighty Oak and QuisQualis a tender creeper
Just to keep it in rhyme in landscaping we might use an old sleeper

As my rhyming will make some want to wince
I've just remembered there is also quince

If you know of someone where the state of there garden is questionable
And really are in need of help to make their garden managable

Then why not ask them to contact the quaint and quirky gardeners where
Quality counts

And remember plant those seeds
For Tidy Gardens all your garden needs.
