

My W for this week has to be for weeds  
And as I've said before Tidy Gardens      All your garden needs

Yes here we are again off in that poetic gardening mode  
And for a garden that looks good all the time there is no secret code

The answer lies in having your garden regularly maintained  
The goals being set and a weed free garden being gained

The services we offer are varied and wide  
And obvious perennial weeds such as willow herb, ground elder and shepherds purse  
we cannot abide

Weed killer used on paths and drives we cannot help  
But if the men used it in the borders they would get a skelp

Wild flowers are all but weeds  
As in your garden they spread their seeds

A weed is only a plant that is growing in the wrong place  
With many people seeing them and screwing up their face

These weeds or wild flowers can be really quite pretty  
And of course have inspired me to continue with my ditty

The added colour these plants give can be quite strong  
So, to have them in your garden how can it be wrong

With honesty a rich mauve and in flower right now  
And then in the autumn those brilliant silver discs      Wow!

Coming soon a carpet of egg shell blue you've maybe got  
Myosotis its real name, to you for-get-me-not

Welsh poppies, sweet cicely, cranesbill and red campion too  
There are loads more and they all help to improve that garden view

Alas to know which ones to let grow  
Is something that not everyone has the knowledge to know

So if you want a garden full of colour with no nasty weeds  
Then, it has to be Tidy Gardens  
All your garden needs
