

Spring has arrived at long long last  
Let's hope that all that snow showers is a thing of the past

Jean has set us a target of s to do  
Let's hope I've got the message and that I can impress you

Savings are something that as we work in your garden we can make  
And the gardeners even know when not to use a rake  
Our gardeners are trained to have a good eye for detail  
And can in the veg garden plant up some kale

Protection is something that we also have to give some thought  
Especially when with plants we have to consider the price at which they have been bought.  
The price of some plants and shrubs can be high  
And we have to ensure that after planting they will not die.

Retirement is something that affects us a lot  
And a high number of retired customers we have got  
We help look after their garden and relieve the strain  
This mainly comes about as they can suffer some pain

Investment in a garden can help to make it look very nice  
And if you come to sell the property it can get you a better price  
The better the garden looks the more pleasure you will gain  
And you do not need to worry about the weeds that could drive you insane

Negative equity Tidy Gardens will help you to avoid  
The best example of this would be in the garden of Mrs Boyd  
Her garden was tired and in need of assistance  
To which we responded by going that extra distance

Grave or graves is something that we also do  
And when people visit they are encouraged to take a pew  
We tend the grave and bright plants we persue  
And the overall effect enhances the view

So at Tidy Gardens we can spring into action  
Oh! and with hollow coring we can relieve the compaction

So for a garden that is free of weeds  
It has to be Tidy Gardens All your garden needs
